

THE UltraLead

**NEW
LOCKING
CLIP**

**Perfect For
Training or
Any Activity**

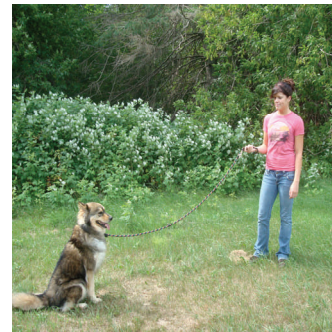

The "UltraLead" is designed for training, fun and everyday use. It supports all levels of training. It's adjustable loop feature has many uses and is preferred by people with disabilities. It is great for hands free activities.

Training Use

Used as a training lead, beginners can start out at half of the distance by clipping both ends of the lead to the collar loop.

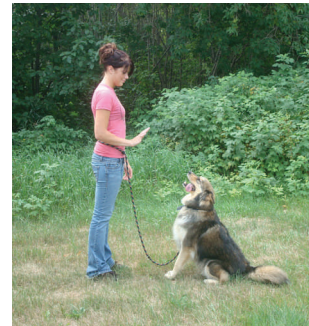

When training progresses the lead is extended to its full length allowing you to maintain control at a greater distance.

Activity Use

With the "UltraLead" you can enjoy all kinds of activities; walking, hiking, jogging, shopping or just plain relaxing with your best friend. The hands free feature makes this a convenient lead to eliminate the stresses of everyday activities.

Use the sliding clip to attach the lead around your waist and snug it into place for hands free or clicker training.
